What is an online pop-up store?

An online pop-up store is a virtual event that helps brands to connect to customers through a live streaming session. During the event, a brand's representative will moderate the session, interact with the customers, advise them about products and facilitate the purchase experience by redirecting them to the brand's website, using a chat booth.

If you are a Brand, you can easily set up your Online Pop-Up Store by using our **Request Form**. You only need to provide a few information and some pictures, and we take care of the rest.
